

Factsheet

Pou: The First Smash

Game Description

POU: The First Smash is an arcade action game for iOS and Android devices. The game development company Creasaur Entertainment Co. globally launched this free-to-play game as first part of the Power of Universe (POU) series, which is contrasting the evil with the good.

This first adventure takes place on planet Earth and introduces the player to seven energy nodes, called “Chakras”, which are located on different continents around the world. These Chakras used to ensure the Earth’s balance but the latter has been put in danger by deformations around the so called “Life Stone” lingering deep inside of the planet. This process awakened some of the worst evil creatures that have ever entered the planet.

The player has to smash all these ruthless monsters in order to protect all the humans on Earth. For achieving this task, there is a series of skills and spells available, like ‘Booming Breeze’, ‘Colossal Cluster’ and ‘Terra Strike’, just to name a few. Completing a level with success results in earning CHI Energy Points, which can be used for further upgrading the players’ defensive power.
